

ENVIRONMENTAL POLICY

COFICAB is strongly committed to protect the natural resources, especially water, air, soil, fauna and flora, as well as all aspects related to the well-being of humanity.

It is COFICAB's duty to:

- Regularly work on the minimization of environmental effects, driven by the design, development, and production of automotive and energy wires and cables, at both national and international levels.
- Continuously enhance its process, products, and services to prevent pollution of the environment and preserve nature, as well as continuous improvement of its environmental performance.
- Meet or exceed all the compliance obligations, whether dictated by national & international regulations, contractual obligations, or COFICAB's values & commitments, and provide them to all interested parties in each country, where we operate, to achieve being an environmentally responsible neighbor in each community.
- Review systematically its environmental objectives to set new targets, assuring continuous and sustainable improvement, while taking into account external environmental threats.
- Set policies and objectives that are accessible to everyone and warrant streamlined internal and external communication to all interested parties. A system that definitely distinguishes the compliance of our activities with the environment, that must be implemented and regularly checked.
- Ensure information sharing among all personnel and with those involved in any activity in COFICAB's name on all aspects related to Environmental Management System through motivation and effective involvement.
- COFICAB is committed to continuously reduce the CO₂ footprint associated with all its activities:
 - ◇ Get aligned with "Paris agreement" aiming for climate neutrality by 2050.
 - ◇ Short term targets are 20% increase on energy efficiency, 20% use of renewable energies and 20% reduction of CO₂ footprint by 2025.

The Environmental Management System is a shared duty inside COFICAB and its effectiveness depends strongly on the involvement and contribution of everyone.
