

ENVIRONMENTAL POLICY

COFICAB is strongly committed to become neutral, protecting the natural resources, water, air, soil, fauna and flora, as well as all aspects related to the well-being of humanity.

It is COFICAB's duty to:

- Minimize the environmental effects, driven by the design, development, and production of automotive and energy wires and cables, at the national and the international levels.
- Promote the environmental management practices throughout the entire supply chain, integrating environmental performance criteria in all decision-making.
- Meet Paris Agreement and related automotive goals, through the implementation of environmental strategy, to reduce greenhouse gas emissions from its activities and products.
- Continuously enhance:
 - ◇ Its processes, promoting energetic efficiency, usage of renewable energy, energetic performance and responsible chemical management.
 - ◇ Its products, and services to prevent pollution of the environment.
 - ◇ The efficient use of natural resources and the integration of its wastes in the circular economy, contributing to sustainable resources management and waste reduction.
 - ◇ The fulfillment with all the compliance obligations, whether dictated by the national and the international regulations, contractual obligations, or COFICAB's values, commitments, and provide them to all interested parties in each country where COFICAB operates.
 - ◇ The Environmental Management System, through the relevant improvement plans.

The roadmap for the Environmental Sustainability is a shared duty inside COFICAB and its effectiveness strongly depends on everyone's involvement and contribution.
